

Introducing the European e-Competence Framework (e-CF)

The e-CF is a **set of 40 competences** commonly used across the ICT sector.

It aims to be the **common language for competences, skills and capability levels** that can be understood by all.

The e-CF is a **durable framework that is updated regularly** to adapt to new technology, jobs, and business developments.

Adopted by a growing community of users in Europe and overseas.

The e-CF is **neutral and free to use**. It is supported by the European Commission and it is developed through the CEN Workshop on ICT Skills, a balanced EU-wide multi-stakeholder agreement.

Visit www.ecompetences.eu to find out more about how you can use the e-CF
