

THE E-CF OFFERS  
A WIDE RANGE OF  
BENEFITS FOR ICT  
PROFESSIONALS

### Driving Forward Professional Development

Staff can assess their skills by using tools based on the e-CF.

ICT professionals can use these tools to benchmark their competences against the e-CF requirements and identify their competence gaps.

### Fuelling ICT Professional's Mobility

The adoption of the e-CF across Europe will foster the international mobility of the ICT workforce.

Everyone will speak the same language.

Professionals will be able to use the e-CF to better evaluate the level of their competences. Companies will find it easier to recruit personnel across borders thanks to this European framework.

### Building a Stronger Computing Profession

The e-CF can help build a shared understanding of the competency needs of professionals working in various roles.

Using a common reference framework for e-competences will help consolidate the ICT profession.
